Serial No.: 09/0147,094

Docket No. 107355-08002

**Amendments to the Claims:** 

This listing of claims will replace all prior versions and listings of the

claims in the above-captioned patent application.

**Listing of Claims:** 

Claim 1 (Currently Amended): A program-guide-display controlling

apparatus comprising:

means for displaying a plurality of program guides on a display unit in a

matrix form by using one of the ordinate and the abscissa as a channel number

axis and another one as a time axis[[,]];

means for determining whether any of a plurality of consecutive time

periods includes a purchased one of a plurality of purchasable programs; and

means for distinguishing on the display unit between the time periods which

include a purchased one of the plurality of purchasable programs and the time

periods which do not include any purchased one of the plurality of purchasable

programs.

Claim 2 (Canceled).

Claim 3 (Previously Presented): A program-guide-display controlling

apparatus comprising:

TECH/256769.1 2

Serial No.: 09/0147,094

Docket No. 107355-08002

means for displaying a plurality of program guides on a display unit in a

matrix form by using one of the ordinate and the abscissa as a channel number

axis and another one as a time axis,

means for determining whether any of a plurality of time periods includes a

purchased one of a plurality of purchasable programs; and

means for distinguishing on the display unit between the time periods which

include a purchased one of the plurality of purchasable programs and the time

periods which do not include any purchased one of the plurality of purchasable

programs

wherein the means for distinguishing comprises at least one first color

associated with the time periods which include a purchased one of the plurality of

purchasable programs and at least one second color which is different than the at

least one first color and is associated with the time periods which do not include

any purchased one of the plurality of purchasable programs.

Claim 4 (Canceled).

Claim 5 (Currently Amended): A program-guide-display controlling

apparatus comprising:

means for displaying a plurality of items of program guide information on a

display unit in a matrix form by using one of the ordinate and the abscissa as a

channel number axis and another one as a time axis;

TECH/256769.1 3

Serial No.: 09/0147,094

Docket No. 107355-08002

means for determining whether any of a plurality of consecutive time

periods includes a purchased one of a plurality of purchasable programs; and

means for distinguishing on the display unit between the time periods which

include a purchased one of the plurality of purchasable programs and the time

periods which do not include any purchased one of the plurality of purchasable

programs, wherein the distinguishing means comprises a means for displaying a

bar proximate to the time periods which include a purchased one of the plurality of

purchasable programs.

Claim 6 (Currently Amended): A program-guide-display controlling

apparatus comprising:

means for displaying a plurality of program guides on a display unit in a

matrix form by using one of the ordinate and the abscissa as a channel number

axis and another one as a time axis; comprising:

selecting means for allowing at least one time period to be selected by a

user, wherein at least one a plurality of programs is associated with the at least

one time period; and

means for distinguishing on the display unit between the at least one time

period selected by the user and time periods not selected by the user.

Claim 7 (Previously Presented): The program-guide-display controlling

apparatus according to claim 6, wherein said means for distinguishing comprises

at least one first color associated with the at least one time period selected by the

4

Docket No. 107355-08002

user, and at least one second color which is different than the at least one first

color and is associated with time periods not selected by the user.

Claim 8 (Previously Presented): The program-guide-display controlling

apparatus according to claim 6 or 7, wherein said setting means allows the starting

time and the ending time of the at least one time period to be set by the user.

Claim 9 (Previously Presented): The program-guide-display controlling

apparatus according to claim 6 or 7, wherein the setting means allows the starting

time and the ending time of the at least one time period to be set for each day of

the week by the user.

Claim 10 (Canceled).

Claim 11 (Currently Amended): A television receiver comprising a program-

guide display controlling apparatus:

means for displaying a plurality of program guides on a display unit in a

matrix form by using one of the ordinate and the abscissa as a channel number

axis and another one as time axis[[, and]];

means for determining whether any of a plurality of consecutive time

periods includes a purchased one of a plurality of purchasable programs; and

means for distinguishing on the display unit between the time periods which

include a purchased one of the plurality of purchasable programs and the time

Docket No. 107355-08002

periods which do not include any purchased one of the plurality of purchasable

programs.

Claim 12 (Currently Amended): A television receiver comprising:

a program-guide-display controlling apparatus comprising:

means for displaying a plurality of program guides on a display unit in

a matrix form by using one of the ordinate and the abscissa as a channel number

axis and another one as a time axis, said program-guide-display controlling

apparatus comprising:;

selecting means for allowing at least one time period to be selected by a

user, wherein at least one a plurality of programs is associated with the at least

one time period; and

means for distinguishing on the display unit between the at least one time

period selected by the user and time periods not selected by the user.

13. (Previously Presented) A television receiver comprising a program-

guide-display controlling apparatus for displaying a plurality of program guides on a

display unit in a matrix form by using one of the ordinate and the abscissa as a

channel number axis and another one as a time axis, said program-guide-display

controlling apparatus comprising:

selecting means for allowing at least one time period to be selected by a

user, wherein at least one a plurality of programs is associated with the at least

6

one time period; and

TECH/256769.1

Serial No.: 09/0147,094

Docket No. 107355-08002

means for distinguishing on the display unit between the at least one time

period selected by the user and time periods not selected by the user,

wherein said setting means allows the starting time and the ending time of the

at least one time period to be set by the user, and said means for distinguishing

comprises at least one first color associated with the at least one time period

selected by the user, and at least one second color which is different than the at

least one first color and is associated with time periods not selected by the user.
